

EIO violation :- Bus contention violation

setup mode :-

set-test-logic -tristate on.

NOTE :-

18 flops

insert-test-logic -number 6

↳ Specifying the no. of scan chains we want

↳ Total 6 scan chains

6 scan chains = 18 flops

1 scan chain = $\frac{18}{6} = 3$ flops

↳ 3 flops / scan chain

insert-test-logic -max-length 6

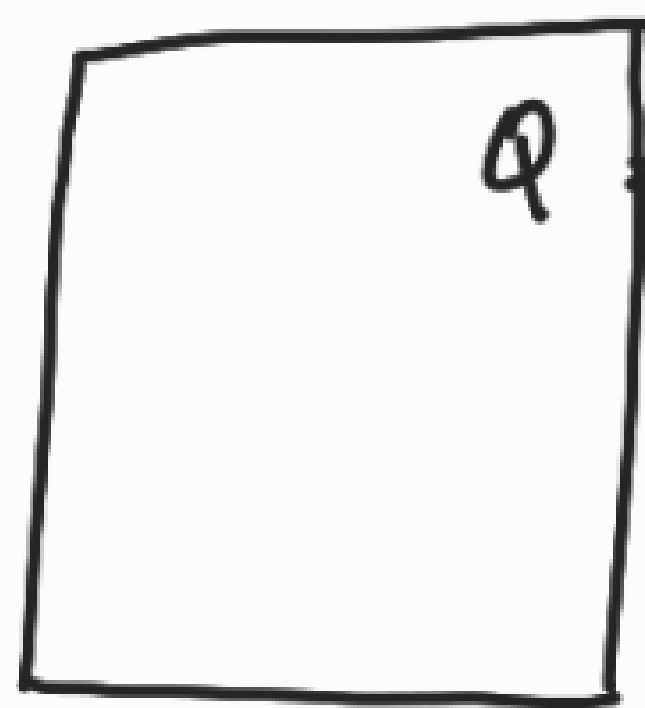

↳ Specifying the max no. of flops in 1 scan chain

↳ 1 scan chain = 6 ffs
 $\frac{18}{6} = 18$ ff

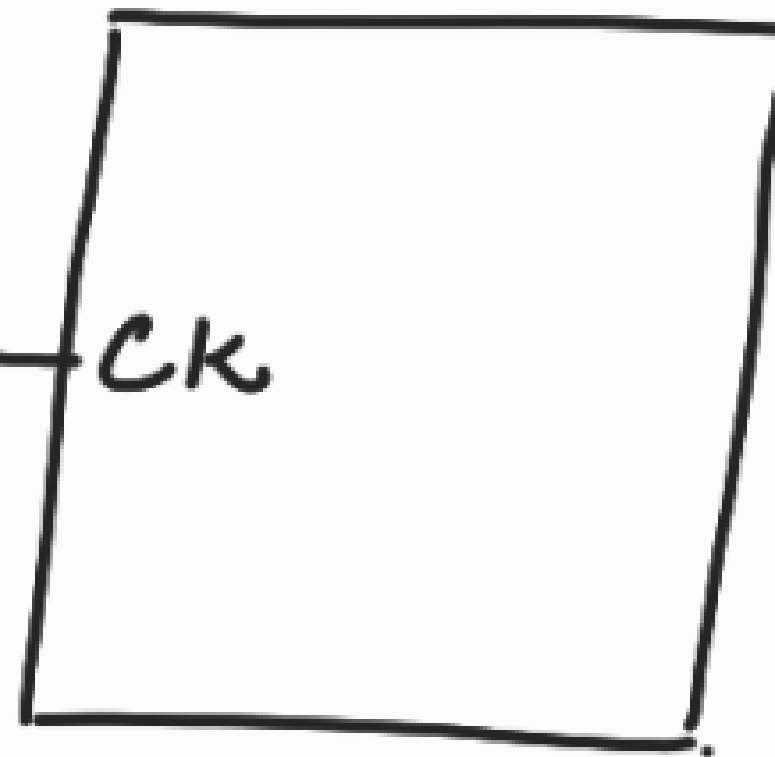

3 scan chains

↳ Total 3 scan chains
6 ffs / scan chain

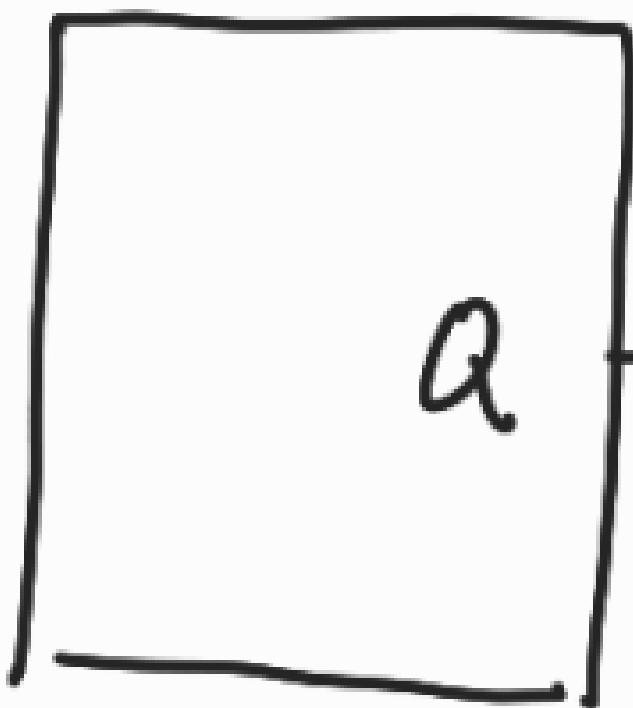

CASE 1 :- PMSel-n-reg

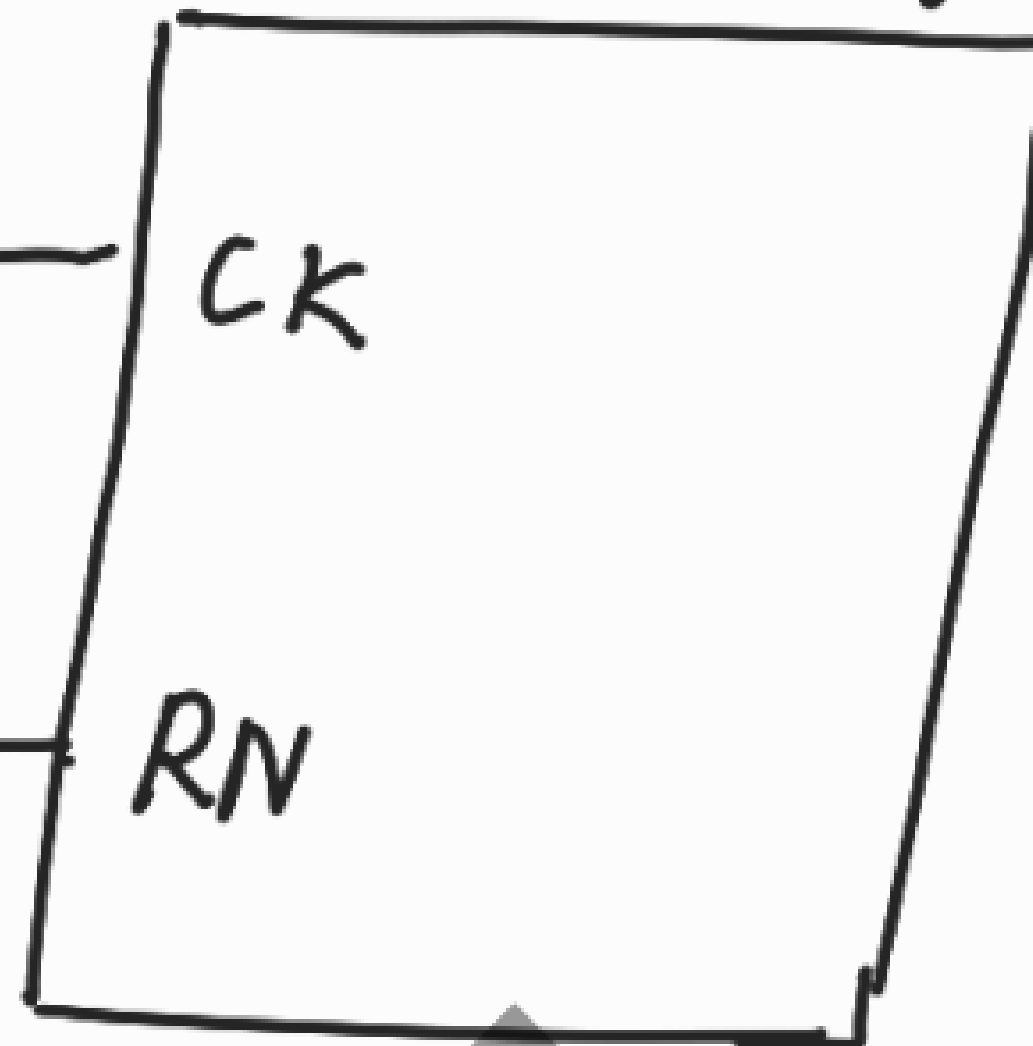

startSyncWn-reg

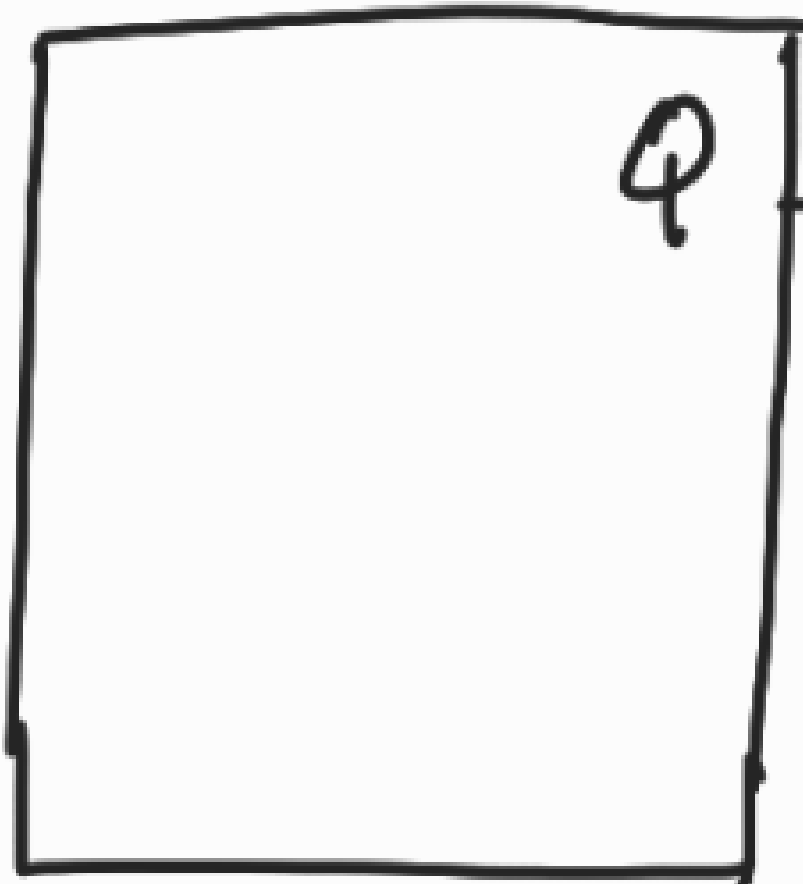

DMsel-n-reg

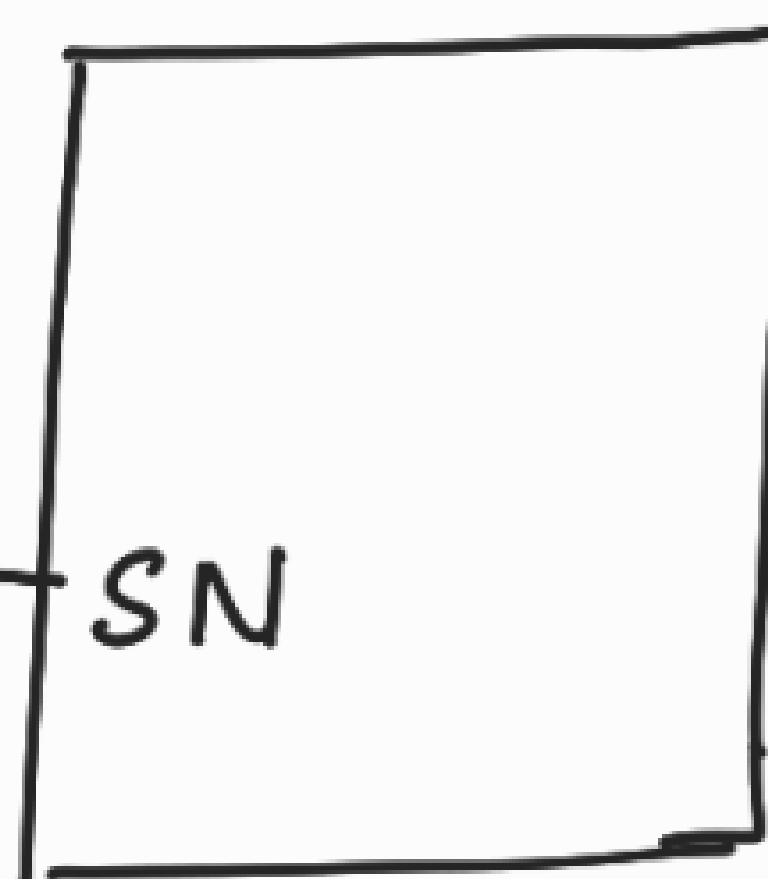

MemWnSyncI-reg

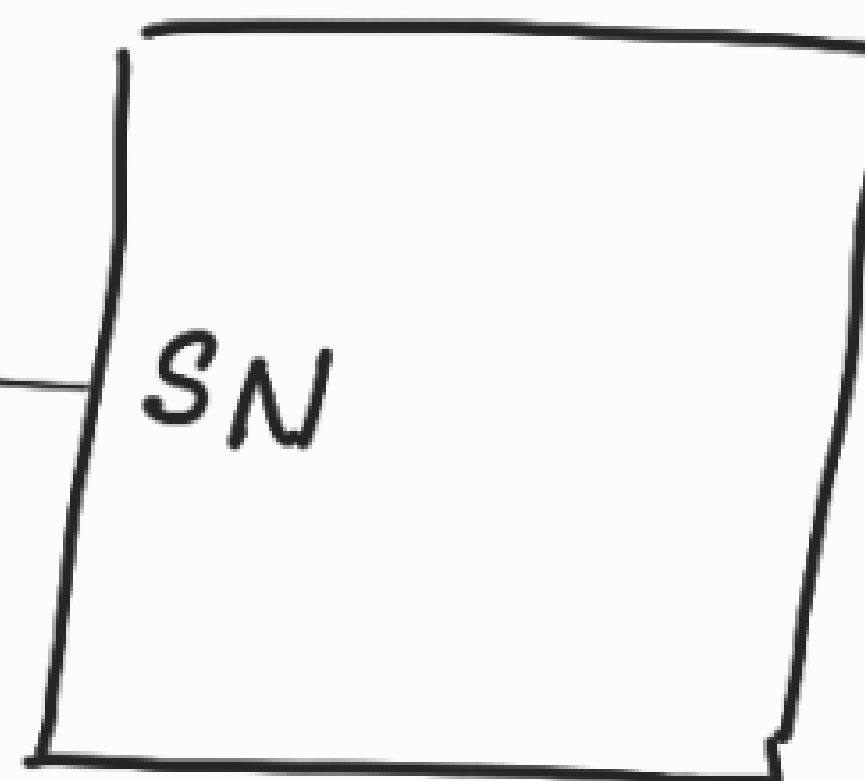

lACKbarOut-reg

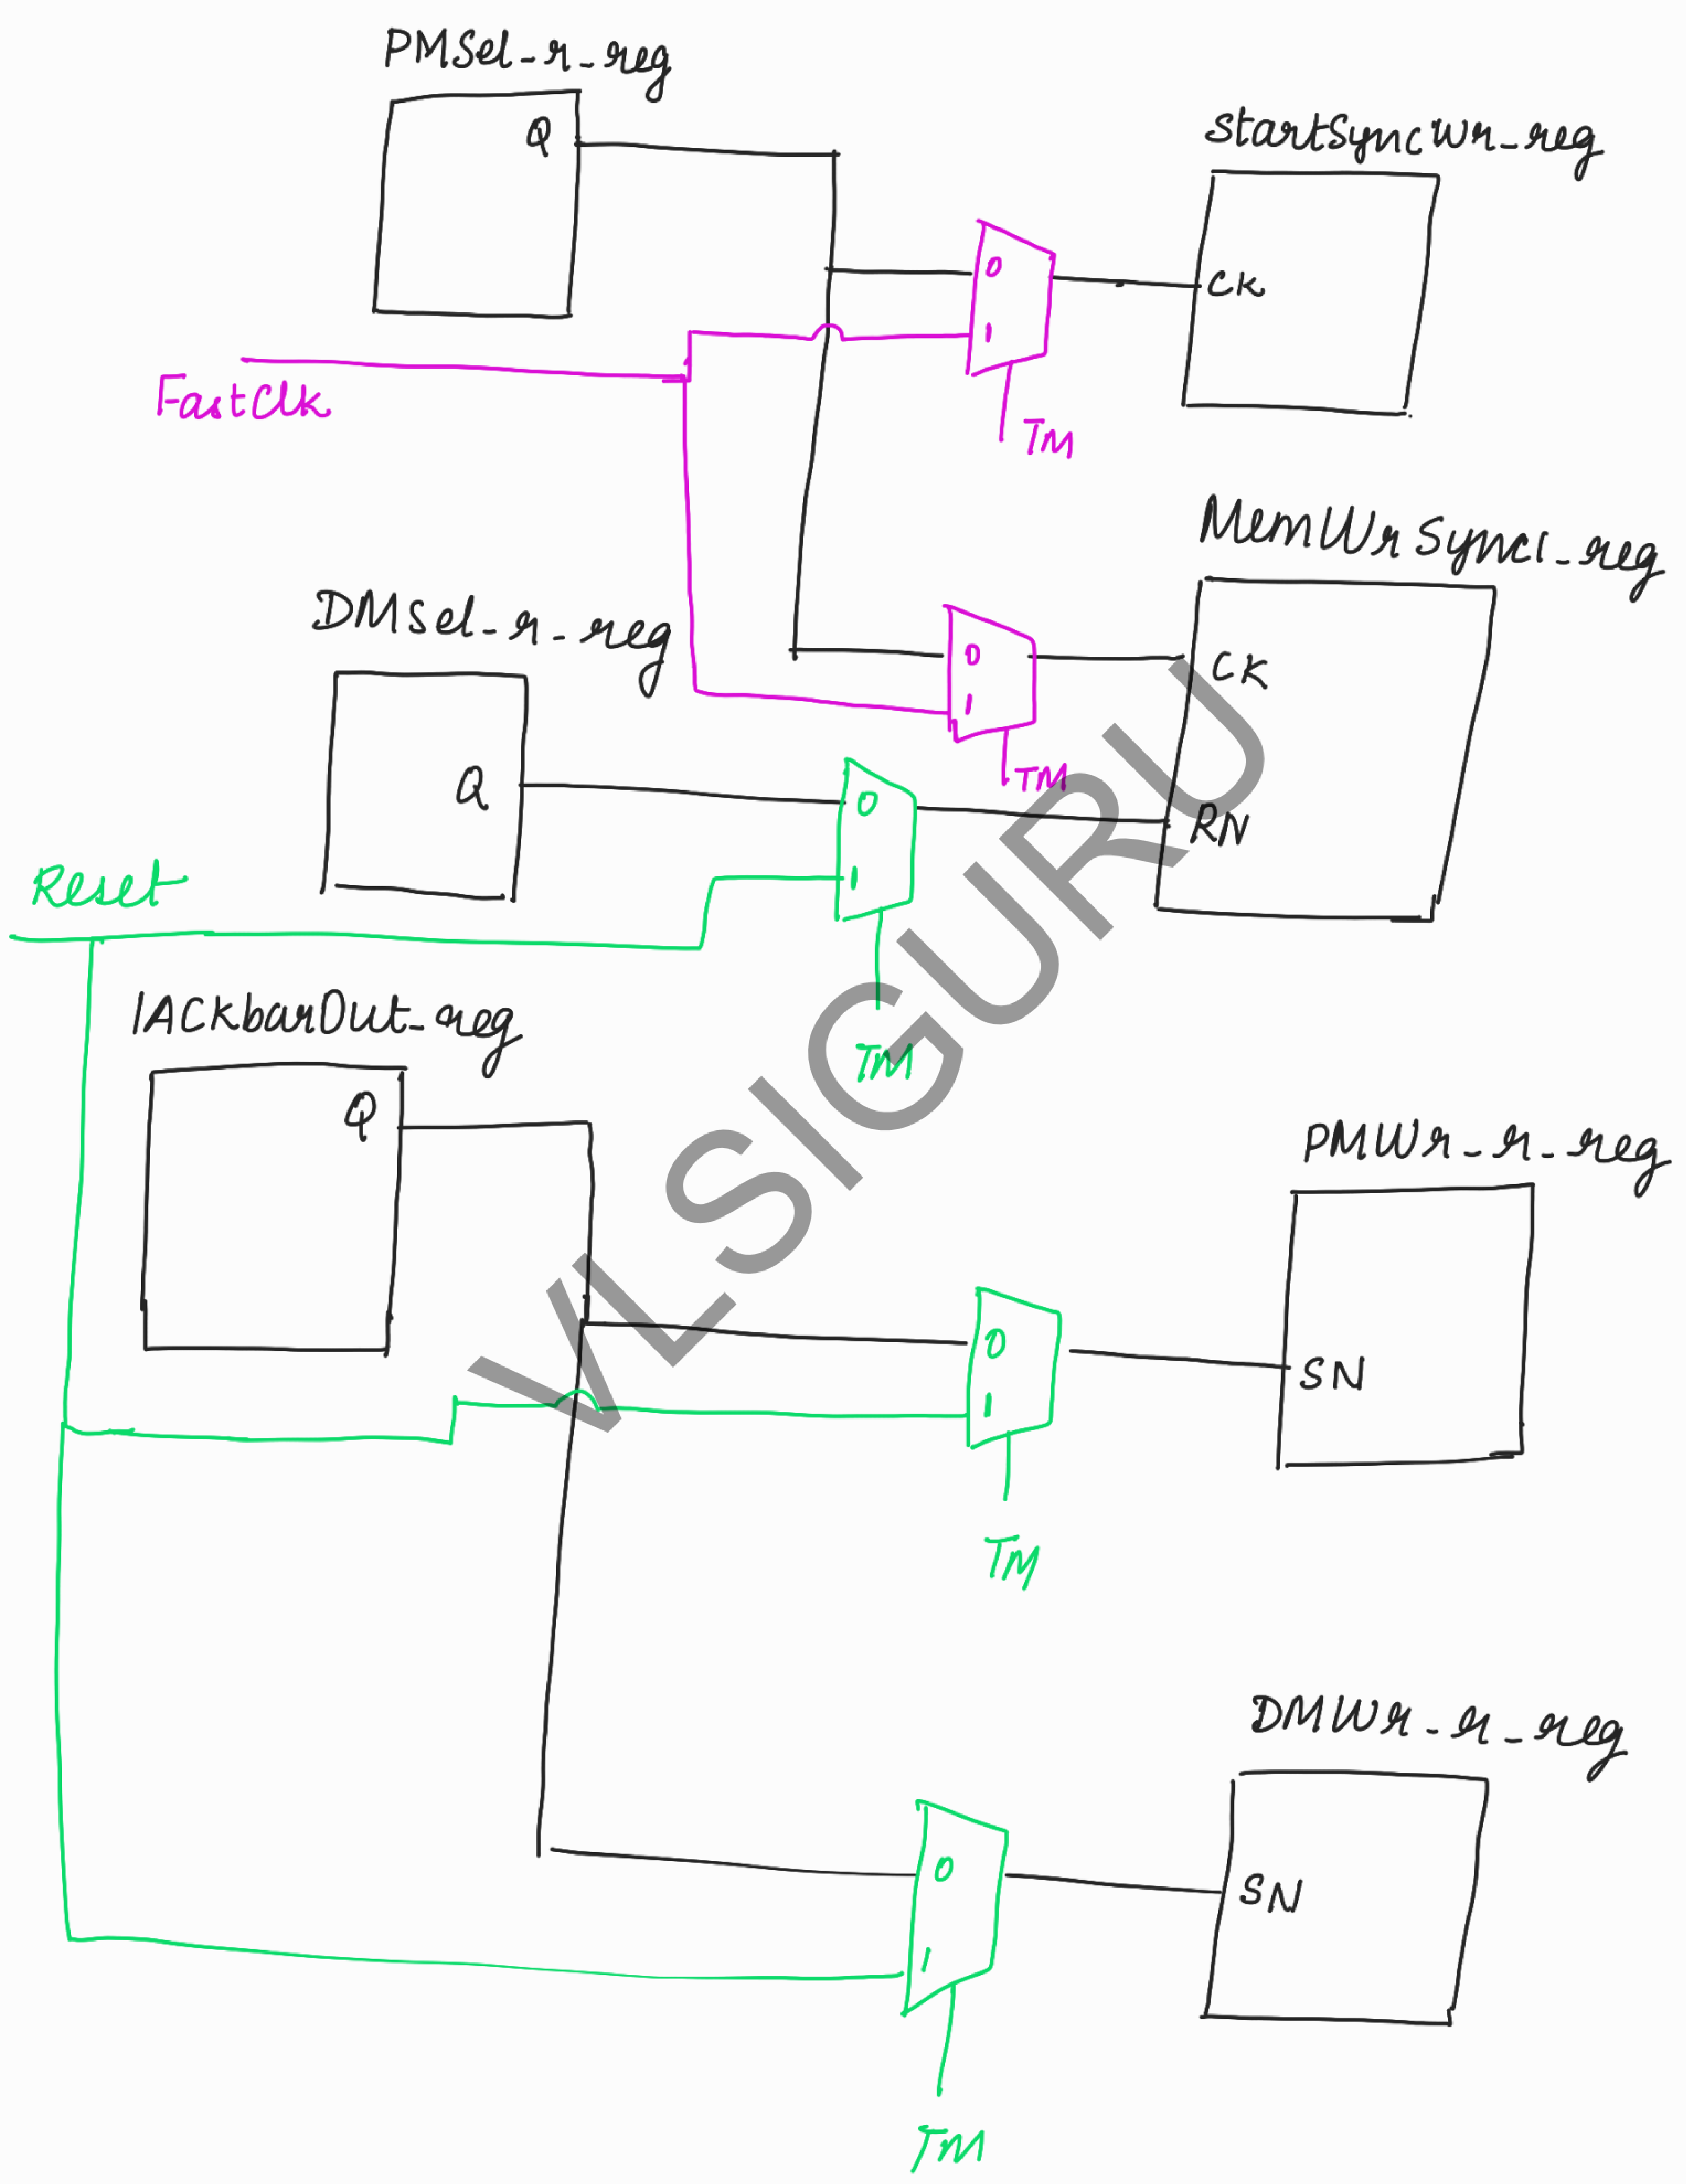

PMWn-n-reg

DMWn-n-reg

Fix (A) :- (5 muxes are required)

Fix B:- (3 muxes are required)
